AUSTRALIS
PREMIUM OPTICAL LENSES

Inventing Australis

Since the first Bi-Focal lenses were created in 1784, not just our lifestyles, hobbies, learning habits and jobs have changed but also our knowledge, problem-solving methods and innovative solutions have altered radically.

Living in the Digital Age, freeform technology and advanced design development has resulted in an overwhelming number of lens designs for various visual needs.

Finding the right lens design for each patient can be a challenging task.

With this in mind, CR Surfacing took a pioneering step and had a look at this problem differently.

“

Let's stop trying to create a design that caters for everyone. Let's look at the individual instead.

— ADAM FLETCHER,
Managing Director
CR Surfacing Laboratories

Fully Tailor-made Lenses

The most accurate visual solution, taking into account your personal feedback and the characteristics of your selected frame. This means, even if someone has the exact same prescription as you do, will be unable to wear your glasses, as they are fully custom made, providing smooth and natural vision in every direction of gaze, far and near.

Active Design System

The uniquely developed lens design is created to suit your lifestyle, personal preference and visual needs. Rather than choosing a lens category for you, the visual solution will be tailor-made to your eyes.

PERSONAL BY DESIGN

Latest Technology

World-class computer technology and state-of-the-art equipment makes it possible to create a fully tailor-made lens just for you. Complex design technologies enable us to provide you exceptional optical quality and precise vision across the thinnest lenses possible.

HyperThin

MightyView

EyeHarmony

Digital Enhancement

AccuPath

OptiGaze

HyperThin

- guaranteed minimum thickness

MightyView

- up to 20% aberration reduction
- swim effect minimisation
- maximum visual acuity

Eye Harmony

- improved fusion of lateral images
- sharper peripheral vision

Digital Enhancement

- improved fusion of vertical images,
- comfortable posture

OptiGaze

- optimised vision for POW measurements

AccuPath

- automatic corridor length calculation
- optimised insets

The Australis Journey

The Australis is not a product off the shelf. It is years of Research and Development to bring you an experience that would not be possible without the latest technologies. The tailor-made lens is created by getting to know your lifestyle, hobbies, personal preferences, so we can build a lens around you. Following up to ensure 100% satisfaction is part of the journey and your feedback will contribute to our laboratory's future innovations.

Australis Expert Dispensing

Our recognised experts ensure that the quality of products and services will exceed your expectations.
